WORK EXPERIENCE

Network Operation Center Engineer

M1 Digital Labs Sdn. Bhd.

12/2022 - Present

Tasks/Responsibilities

- Proactively monitored and supported customer IT infrastructure and systems, ensuring operational continuity and adherence to service level agreements.
- Conducted health and security monitoring, performed first-level troubleshooting, managed monthly Windows patching, and oversaw backup operations across On-Prem and Cloud environments.
- Collaborated with cross-functional teams to diagnose and resolve complex technical issues, while documenting procedures and best practices to expand the knowledge base and support continuous training initiatives.

Contact : Tan Khang Liang (Assistant Operational Manager) -
Contact available upon request

Global Support Engineer

NTT Cloud Communications (Malaysia) Sdn. Bhd.

05/2021 - 11/2022

Tasks/Responsibilities

- Provided global technical support for VoIP/UC services, resolving customer issues via multiple channels (calls, chats, email) using Salesforce and ServiceNow.
- Diagnosed and resolved issues in cloud communications (VoIP/SIP call flows) while delivering Level 1 technical support for UC&C platforms like Microsoft Teams and Cisco Webex.
- Worked closely with cross-functional teams, carriers, and vendors to expedite issue resolution while creating and maintaining KB articles to streamline support processes and reduce resolution times.

Contact : Navin Sangara (Technical Support Manager) -
Contact available upon request

Network Operation Center Engineer

Celcom Networks Sdn. Bhd.

06/2019 - 05/2021

Tasks/Responsibilities

- Executed key RAN operational functions including real-time performance monitoring, fault diagnosis, and coordinated corrective maintenance to optimize network availability.
- Conducted first-line PaCo router diagnostics and maintained 24/7 surveillance of critical KPIs (throughput, data volume, PDP attach rates), enabling high network availability.
- Played key role in fiber network maintenance by pinpointing fault locations, mitigating DWDM degradation through continuous monitoring, and executing precision wavelength adjustments to ensure optimal signal quality.

Contact : Shah Rahmat (NOC Shift Lead) - Contact available upon request

EDUCATION

Bachelor in Mechanical Engineering (Hons)

Universiti Teknologi Mara (UiTM)

02/2016 - 02/2019

CGPA : 3.55

SKILLS

Network monitoring and first level troubleshooting

Cisco Switching/Routing

Microsoft Azure Administration

VoIP (SIP-signalling) first-level troubleshooting

Microsoft Teams Administration

IP Core Network

Fiber optic transmission, DWDM

Windows Patching

Azure Networking

SOFTWARE/TOOLS

Microsoft Azure Portal

Microsoft Teams Admin Center

Cisco Evolved Programmable Network Manager

Cisco Webex Control Hub

Solarwind Orion

Wireshark

N-able : N-Central, Cove Data Protection

SentinelOne

Huawei's iMaster NCE (Network Cloud Engine) and
Automatically Switched Optical Network (ASON)

Ticketing System : Salesforce, BMC and ServiceNow

CERTIFICATIONS

AZ900 – Microsoft Certified : Azure Fundamentals
(05/2021 - Present)

MS700 – Microsoft 365 Certified : Teams Administrator
Associate (10/2022 - Present)

Cisco 200-301 – Cisco Certified Network Associate (CCNA)
(12/2023 - 12/2026)

AZ104 – Microsoft Certified : Azure Administrator
(12/2024 - Present)

AZ104 – Microsoft Certified : Azure Network Engineer
Associate (12/2025 - Present)
